Project Development Phase
Model Performance Test

Date	03 October 2026
Team ID	
Project Name	Employee Data Import using Transform Maps (Spreadsheet) - ServiceNow
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template. This project does not use a machine learning model, so the template is applied to the performance of the **Transform Map import**: its configuration, the accuracy of the imported data, and the results of any tuning.

S.No.	Parameter	Values
1.	Model (Import) Summary	Source: Excel / CSV spreadsheet attached to a Data Source Staging table: Import Set table (u_) Transform Map: staging table to target table with Field Maps Employee ID mapped to the Employee (sys_user) reference field; Coalesce on Employee ID Department pulled into each record by a field map script Access secured with ACLs and tested using Impersonate User
2.	Accuracy	**Total rows in the spreadsheet:** **Rows loaded into the staging table:** **Records inserted:** **Records updated:** **Rows ignored / errors:** **Employee link accuracy (records linked to the correct employee / total):** **Department accuracy (records with the correct department / total):** **Overall import accuracy (%):** (successful records / total rows) x 100
3.	Tuning Result (if done)	**Changes made** (for example corrected field map, date format fix, Coalesce added, file split into batches): **Import accuracy after tuning (%):** **Time taken for the import:**
