Functional & Performance Testing Template
Transform Map Import Performance Test

Date	03 October 2026
Team ID	
Project Name	Employee Data Import using Transform Maps (Spreadsheet) - ServiceNow
Maximum Marks	

Test Scenarios & Results

Run each test on your ServiceNow instance, then record the actual result and mark Pass or Fail. The time and size targets in the performance tests are suggested targets; adjust them to match your instance.

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Spreadsheet File Validation (e.g., .xlsx, .csv)	Attach a valid Excel / CSV file and an invalid file type to the Data Source	Valid file accepted and loaded; invalid file rejected or shows an error		
FT-02	Column Header Validation	Load a file with correct headers and one with missing or misnamed headers	Correct headers create the right staging fields; wrong headers are flagged as unmapped		
FT-03	Data Loading into Staging Table	Click Load All Records on the Data Source	All rows appear in the Import Set table; row count matches the spreadsheet		
FT-04	Transform Map Execution	Run the Transform on the Import Set	Records are inserted in the target table; Transform History shows the counts		
FT-05	Employee Reference Mapping	Import rows with valid and unknown Employee IDs	Valid IDs link to the correct employee; unknown IDs are ignored or flagged in the Import Log		
FT-06	Department Population	Import employees and open the imported records	Department is filled in automatically from the employee record		
FT-07	Coalesce (Duplicate Control)	Re-import the same file with one changed value	Existing records are updated; no duplicate records are created		
FT-08	ACL Access Check (Impersonate User)	Impersonate an unauthorised user and an authorised user and open the records	Unauthorised user sees restricted data hidden; authorised user sees permitted records and fields		
PT-01	Import Time Test	Use a timer to measure load plus transform time for a sample file (e.g., 100 rows)	Should complete within 1 minute		
PT-02	Large File Test	Import a file with 1000 or more rows	Loads and transforms without errors or timeouts		

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
PT-03	Multiple Imports Test	Run several imports one after another (or schedule them close together)	All imports complete without slowing down or failing		
PT-04	Target List View Load Test	Open the target table list with all imported records and filter by department	List loads and filters smoothly
